

## Mapping Fusion Middleware Success: Case Studies That Lead the Way

A workshop at the *COLLABORATE 08 — OAUG Forum* at the Hyatt Regency Hotel, Denver, Colorado, Sunday, April 13, 2008

The OAUG presents a world-class line-up brought to you by Oracle Development Tools User Group (ODTUG). Actual projects using the Fusion Middleware suite will be presented, with an emphasis on the Oracle E-Business Suite, followed by a Q&A session with the panel of presenters. At the end of this full-day workshop, you will know what skill set is needed for successful Fusion development. This is your chance to learn from people who have real-life Fusion experience. If you want to take maximum advantage of the Oracle Fusion Middleware, you cannot afford to miss this workshop.

ODTUG has brought together a combination of resources to provide insight into Fusion Middleware development and best practices. The case studies have been chosen from the winners of the Oracle Innovation Award for their use of Oracle Fusion Middleware. Technical sessions will be presented by ODTUG Oracle Fusion Middleware experts and Oracle product managers.

Preliminary Schedule

### **Sunday, April 13, 2008**

**8:00 a.m.** Opening Welcome

**8:45 a.m.** Case Study using Application Integration Architecture (AIA) and Process Integration Packages (PIP)
